Invisalign

Invisalign is a popular orthodontic treatment that allows for the correction of teeth using transparent aligners without the need for braces. Invisalign treatment requires fewer visits to the orthodontist since there is no need for adjustments to wires or brackets, making it an ideal option for those living abroad. With just 3 to 4 appointments, you can achieve the smile you desire. Invisalign is a non-invasive treatment suitable for many young and adult individuals with orthodontic issues at any age.

Fati Tsarikaeva

Dental Implant

The dental implant treatment begins with a meticulous examination and planning by our experts. It is recommended to choose leading companies that pioneer the latest technology for the implants used in the procedure. The surgical stage, resulting from our oral surgeons carefully placing the implants, usually takes place under local anesthesia. This treatment is notable for its applicability to patients of all ages. After the healing and integration process, patients enjoy a natural smile with the application of custom-designed dental prostheses. Experience the pleasure of having a strong and aesthetic smile with implants.

Hollywood Smile

Hollywood Smile is a popular cosmetic dental treatment aimed at enhancing the appearance of teeth. The term "Hollywood Smile" refers to the white, symmetrical, striking, and perfectly aligned teeth that many Hollywood celebrities possess. The process includes a series of procedures such as teeth whitening, glass porcelain applications, zirconium restorations, orthodontic treatment, and gum aesthetics. Through proper planning and material selection based on facial structure, smile line, specific requirements, and aesthetic expectations, the ideal Hollywood Smile can be achieved.

Teeth Whitening

Teeth whitening is a cosmetic dental procedure that aims to eliminate stains and discolorations on the surface of teeth, resulting in a brighter and whiter appearance. This procedure can be performed through various methods, leading to a significant improvement in the appearance of your teeth and providing extra support for your confidence.
